EUROPEAN SKYTIME PURCHASES FLEET OF BOMBARDIER LEARJET BUSINESS JETS

- **Eight new Learjet aircraft orders from European Skytime in the past month**

Paris, June 20, 2007 – Bombardier Aerospace today announced that European Skytime of Gloucestershire, UK has placed firm orders for six high-performance Learjet business jets, a total of eight Learjet aircraft orders in the past month. The new order includes three light Learjet 40 XR jets, three super-light Learjet 45 XR jets and two midsize Learjet 60 XR jets.

European Skytime runs a leading European block charter program, utilizing numerous Bombardier business jets including Learjet 31, Learjet 45, Learjet 60 and Challenger 604 aircraft. The new Learjet order, scheduled for delivery over the next two years, will be based in London.

“We are making a substantial commitment to ensure our customers have guaranteed access to a flexible, top quality fleet of jets. With their proven fuel efficiency, outstanding speed and range combination, and spacious, comfortable cabins, the Learjet aircraft family is the right fit for our business model,” said Steve Westlake, managing director of European Skytime. “A limited number of fractional shares, offering 50 and 100 hour blocks, will be available for purchase on this new fleet. We offer our passengers the very best products and services. Our company stands by this and it sets us apart from our competition.”

European Skytime further sets itself apart from its competitors through its commitment to completely offset the emissions generated by its own operations, becoming the world’s first CarbonNeutral[®] air charter broker. The innovative charter company is also the first to offer its clients the option to offset the CO₂ generated by their private jet, helicopter or airliner flight.
